

Presenter: Barb Toohey

## Course 914 What's new (or better) at FamilySearch

7 billion searchable records!

47.4 million new records added in April 2019.

If you are not using FamilySearch you are overlooking the biggest collection of family history data in the world. And it is FREE!

Family search has been collecting data for 130 years but is much more than a database. Add the single Family Tree, the searchable Catalog, the Genealogies, Books and Research Wiki plus the exciting new features of Memories, Relatives around Me on the App and Compare a Face function.
